ATMOSPHERIC RESEARCH

Contents Volume 36, 1995

Torrential precipitations on the Spanish east coast: The role of the Mediterranean sea surface temperature
M. Millán, M.J. Estrela and V. Caselles 1

Some characteristics of the precipitation formed within winter storms over eastern Newfoundland
R.E. Stewart and R.W. Crawford 17

A parameterization of cloud droplet nucleation. Part II: multiple aerosol types
S.J. Ghan, C.C. Chuang, R.C. Easter and J.E. Penner 39

Wind-produced submicron particles in the marine atmosphere
E.K. Bigg, J.L. Gras and D.J.C. Mossop 55

Theory of the water vapor continuum and validations
R.H. Tipping and Q. Ma 69

Ice-forming nuclei over the East China Sea
J. Rosinski, C.T. Nagamoto and M.Y. Zhou 95

Simulation of hydrometeor size spectra evolution by water–water, ice–water and ice–ice interactions
A.P. Khain and I.L. Sednev 107

An environmental experiment over Athens urban area under sea breeze conditions
H.D. Kambezidis, A.A. Peppes and D. Melas 139

Air mass characteristics as related to tropical wave precipitation over Lesser Antilles archipelago
C. Asselin de Beauville 157

Letter Section

A new concept for assessing silver iodide cloud-seeding effects in snow by physical and chemical methods
J.A. Warburton, S.K. Chai and L.G. Young 171

Book Reviews 177

Announcement 181

Editorial 183

Climatic mapping of ice loads based on airport weather observations
L. Makkonen and K. Ahti 185

Spatial variation of extreme values for freezing rain
J. Laflamme 195

A comparison of selected models for estimating cable icing
P. McComber, J. Druez and J. Laflamme 207

Estimating icing amounts caused by freezing precipitation in Canada
T.-C. Yip 221

2-D and 3-D modelling of low density ice accretion on rotating wires with variable surface irregularities
F. Porcú, E. Smargiassi and F. Prodi 233

Simulation of icicle growth using a three-dimensional random walk model
K. Szilder and E.P. Lozowski 243
The effect of aerodynamic torque on the rotation of an overhead line conductor during snow accretion
G. Poots and P.L.I. Skelton 251
Correlation of ice load with large-scale and local meteorological conditions in Hungary
J. Mika, T. Szentimrey, M. Csomor, Z. Kövér, C. Nemes and P. Domonkos 261
Use and calibration of Rosemount ice detectors for meteorological research
K.J. Claffey, K.F. Jones and C.C. Ryerson 277
Wind tunnel evaluation of a rime metering device using a magnetostrictive sensor
J.L. Laforte, M.A. Allaire and J. Laflamme 287
A method to estimate icing loads on overhead lines
J. Pezard 303
Hungarian icing activity survey
Dr.I. Krómer 311
Superstructure spray and ice accretion on a large U.S. Coast Guard cutter
C.C. Ryerson 321
Aircraft icing in visual meterological conditions below low stratus clouds
W. Fuchs and K.-P. Schickel 339
